Middle Mile Broadband Infrastructure Program

Local networks are important for bringing high-speed internet to communities. But local networks aren't enough. They need to connect to robust, high-capacity national and regional networks. Middle mile infrastructure makes this possible. By connecting to major networks, local networks can ensure reliable high-speed internet service for even the most remote communities.

The [Enabling Middle Mile Broadband Infrastructure Program](#) provides funding for this vital part of our nation's high-speed network. With \$1 billion in funding, the program will reduce the cost of bringing high-speed internet to unserved and underserved communities. To learn more about Notice of Funding Opportunity visit [Broadband USA](#).
